

MIG21 Reporter

With the help of MIG21 Reporter it is possible to access and utilize the data from the MIG21 database in order to display the information in a user-defined format. During this two-day seminar the participants will be introduced to the structure and the use of the MIG21 Reporter. They will learn to adapt existing standard reports and create their own reports. Using sample reports, the most important tables in the MIG21 database as well as the functions and special features of MIG21 Reporter will be explained. Moreover, the participants will receive hints and tips on how to optimize the creation of their own reports.

Topics

▪ MIG21 Reporter – Working Area
